EDUCATION

Thakur College of Engineering and Technology

Bachelor of Engineering in Information Technology

2022-2026

9.44 CGPA

T.P Bhatia College of Science

HSC in Science with CS

2020-2022

76%

EXPERIENCE

Kifayti Health

Software Developer Intern

Aug 2024 – Oct 2024

Remote

Go4Explore

Frontend Developer

Aug 2024 – Sept 2024

Remote

- Contributed to the development of key features, including the user dashboard, story uploads, payment gateway integration, and forums using Next.js and Tailwind CSS.
- Optimized website performance, significantly improving the Lighthouse score by refining code and implementing best practices for faster load times and enhanced user experience.
- Collaborated with the backend team to integrate APIs, enhancing data flow and system functionality.

MentorMenti

Fullstack Developer

April 2024 – June 2024

Remote

- Developed RESTful APIs for event and job listings and managed event organization functionalities using NodeJs, ExpressJs and MongoDB.
- Designed and built the frontend of the BadBusiness website using React.js and TailwindCSS, focusing on seamless user navigation and optimal performance.
- Integrated frontend components with backend services, ensuring smooth data handling and real-time updates.
- Contributed to the overall architecture and development of key features to improve site functionality and user interaction.

PROJECTS

Insightify | [NextJs](#), [NodeJs](#), [ExpressJs](#), [Flask](#), [TailwindCSS](#) | |

- A price comparison platform leveraging web scraping to provide real-time pricing data from Amazon, eBay, and Flipkart.
- Designed a seamless user interface with Tailwind CSS, ensuring intuitive navigation and usability.
- Implemented web scraping using Flask to aggregate data efficiently across multiple e-commerce platforms.
- Recognized for innovation and usability, winning 1st place at the DevQuest Hackathon.

Ascend | [NextJs](#), [Shadcn](#), [TailwindCSS](#), [Github API](#), [Prisma](#), [NeonDb](#), [Clerk](#) | |

- A collaborative project management tool featuring intuitive Kanban boards for visual task organization.
- Enabled effective sprint planning and real-time reporting for tracking progress and key metrics.
- Integrated Prisma and NeonDB for robust data management and Clerk for secure user authentication.
- Automated generation of end-of-sprint reports by analyzing GitHub commits on linked project repositories.
- Designed with a responsive UI to enhance workflow efficiency and team communication.

Echo | [ReactJs](#), [NodeJs](#), [ExpressJs](#), [Nodemailer](#), [Gemini](#) | |

- An AI-driven web app for generating and sending professional emails with user-friendly functionality.
- Integrated Firebase for secure authentication and React.js with Tailwind CSS for a visually appealing frontend.
- Utilized Nodemailer for seamless email delivery and the Gemini API for intelligent email content generation.
- Focused on performance and ease of use, delivering a complete email automation solution.

EXTRACURRICULAR AND ACHIEVEMENTS

- Won DevQuest Hackathon by IIT Jodhpur | [Certificate](#)
- GeeksForGeeks Student Chapter TCET | Technical Member
- Solved 300+ problems on platforms like LeetCode, CodeChef, and GeeksforGeeks
- 2 stars on CodeChef | [CodeChef Profile](#)
- 3 stars on GeeksforGeeks (Max Rating 1667) | [GFG Profile](#)

TECHNICAL SKILLS

Languages: C++, Python, Javascript, Typescript, HTML/CSS, SQL

Technologies/Frameworks: GitHub, ReactJs, NextJs, NodeJs, ExpressJs, TailwindCSS, MongoDB, Prisma

Developer Tools: Postman, Vercel, Render, Netlify
