Education

Thakur College of Engineering and Technology	**2022-2026**
Bachelor of Engineering in Information Technology	*9.4 CGPA*
T.P Bhatia College of Science	**2020-2022**
HSC in Science with CS	*76%*

Experience

Kifayti Health	**Aug 2024 – Oct 2024**
Software Developer Intern	*Remote*

go4explore	**Aug 2024 – Sept 2024**
Frontend Developer	*Remote*

- Contributed to core features including the user dashboard, story uploads, payment gateway integration, and forums, utilizing Next.js and Tailwind CSS for enhanced functionality and a responsive design.
- Enhanced site performance, achieving a significant improvement in the Lighthouse score by optimizing code and implementing best practices, which greatly boosted the website's speed and user experience.

MentorMenti	**April 2024 – June 2024**
Fullstack Developer	*Remote*

- Created APIs for event and job listings, and managed event organization functionalities using Node.js and Express.js.
- Designed and implemented the frontend of the BadBusiness website using React.js and TailwindCSS, ensuring seamless navigation and integration with backend services.

Projects

Insightify | *NextJs, NodeJs, ExpressJs, Flask, TailwindCSS* | ⭘ | ▶

- A price comparison platform that leverages web scraping techniques to provide users with real-time pricing data from Amazon, eBay, and Flipkart.
- Achieved recognition for innovation and user experience, securing 1st place at the DevQuest Hackathon.

Ascend | *NextJs, Shadcn, TailwindCSS, Prisma, NeonDb, Clerk* | ⭘ | 🌐

- A collaborative project management application designed to enhance workflow efficiency and improve team communication.
- Equipped with intuitive Kanban boards for visual task management, effective sprint planning, and real-time reporting to track progress and key metrics.

Echo | *ReactJs, NodeJs, ExpressJs, Nodemailer, Gemini* | ⭘ | 🌐

- An AI-driven web application for generating and sending emails, integrating Firebase to ensure secure user authentication.
- Features a robust frontend developed with ReactJS and styled using Tailwind CSS, paired with a backend built on Node.js and Express.js.
- Incorporates Nodemailer for seamless email delivery and the Gemini API for efficient email content generation.

CoinCanvas | *ReactJs, TailwindCSS, Material UI, CoinGeckoAPI* | ⭘ | 🌐

- A digital coin tracker app providing users with real-time cryptocurrency data and interactive graphs powered by the CoinGecko API.
- Features an organized list of coins with current price details and percentage changes, utilizing ReactJS, Tailwind CSS, and Material UI for an appealing UI.

Technical Skills

Languages: C++, Python, Javascript, Typescript, HTML/CSS, SQL
Technologies/Frameworks: GitHub, ReactJs, NextJs, NodeJs, ExpressJs, TailwindCSS, MongoDB, Prisma
Developer Tools: Postman, Vercel, Render, Netlify

Extracurricular

Won DevQuest Hackathon by IIT Jodhpur	**January 2024**
Project: Insightify	

- Role: Frontend Developer.
- Technologies: NextJs, NodeJs, ExpressJs, Flask, TailwindCSS
- Insightify is your go-to platform for real-time price comparison, intelligent product tracking, and insightful price trend analysis.

GeeksForGeeks Student Chapter TCET	**Sept 2023 – Sept 2024**
Technical Member	

- Contributed to the frontend web development for GfG committee.
- Implemented responsive designs and optimized website performance.
- Created DSA questions for programming contests organized by GfG committee.
